ABSTRACTED-PUB-NO: RO 115805B

*difference is of radiation
instead of UV*

BASIC-ABSTRACT:

NOVELTY - Hydrophilic super absorbents are obtained by initiating polymerisation reaction between 35-45% acrylic monomer, 0.02-0.04% potassium persulfate, 0.01% ethylene diamino tetraacetate and water to 100% with gamma radiation generated by Co-60 radioisotopes or accelerated electrons followed by thermochemical propagation of reaction, addition of 2-8% mono potassium phosphate, 4-16% potassium nitrate, 0.3-0.6% magnesium sulfate. Product obtained is in gel or dried granules form.

USE - Hydrophilic super absorbents are used in agriculture,

horticulture and
has other applications.

CHOSEN-DRAWING: Dwg.0/0
